Professional Summary

.NET Backend Developer with hands-on experience in C#, ADO.NET, and SQL Server, specializing in building secure and scalable database-driven applications. Skilled in developing RESTful APIs, writing optimized SQL queries, and implementing stored procedures. Strong understanding of backend architecture and clean coding practices. Currently undergoing .NET training at Capgemini Engineering. Seeking entry-level backend developer roles.

Technical Skills

Backend Technologies: C#, .NET, ASP.NET Core, ADO.NET

Database: SQL Server, MySQL

Programming Languages: C#, SQL, Java

Core Concepts: OOP, DBMS, Exception Handling, REST APIs

Tools: Git, GitHub, VS Code, SSMS

Projects

- **Quantity Measurement System** ASP.NET Core, ADO.NET, SQL Server
 - Designed a normalized relational database schema to manage units, products, and measurement conversions ensuring data consistency and integrity.
 - Developed RESTful APIs for managing measurement operations and unit conversions, tested using Postman.
 - Implemented stored procedures for conversion logic and data operations, reducing application-side complexity.
 - Used ADO.NET with parameterized queries to prevent SQL injection and ensure secure data access.
- **EShoppingZone E-Commerce Platform (In Progress)** ASP.NET Core, EF Core, SQL Server
 - Designing a microservices-based e-commerce platform with separate services for Profile, Product, Cart, Order, and Wallet.
 - Implementing core user workflows including product browsing, cart management, and order placement.
 - Developing secure authentication and role-based authorization using JWT and ASP.NET Core Identity.
 - Building wallet module with transaction handling (credit/debit) using EF Core transactions.
 - Applying clean architecture (Controller–Service–Repository) with dependency injection for scalable backend design.

Experience

.Net Developer Intern | Capgemini, India Dec 2025 – Present

- Working on backend development using C#, ASP.NET Core, and SQL Server.
- Developing and testing RESTful APIs and performing database operations.
- Applying clean architecture (Controller–Service–Repository) in projects.

Software Development Intern | Starlink Communication Pvt. Ltd Jul 2025 – Sep 2025

- Developed backend modules using ADO.NET and SQL Server.
- Optimized SQL queries using joins and indexing.
- Performed CRUD operations with secure parameterized queries.

Education

- **B.Tech in Computer Science** 2022 – 2026
- GLA University CPI: 7.49/10
