

SAGAR RAJPUT

9149294231 — sagarraajput1810@gmail.com — linkedin.com/in/thesagarraajput — github.com/sagarraajput1810

Professional Summary

Aspiring Backend Engineer with Python proficiency and enterprise .NET development expertise. Specialist in architecting scalable Microservices and integrating AI/LLM models (LangChain, Gemini) into enterprise workflows. Proven track record in designing N-Tier software solutions that bridge AI intelligence with robust backend infrastructure.

Technical Skills

Backend/Enterprise: .NET Core, C#, Python (FastAPI/Flask), Microservices Architecture, REST APIs, SQL Server, RabbitMQ
Frontend: Angular, React, TypeScript, Tailwind CSS
AI Data: LangChain, LLM Integration, RAG (Retrieval-Augmented Generation), Prompt Engineering, Data Preprocessing
DevOps/Cloud: Docker, Git, Linux, Message Queues, CI/CD Pipelines

Experience

Capgemini

Dec 2025 – Present

.NET Developer Trainee

Onsite

Architecting enterprise-grade modules using C# and .NET Core, ensuring high performance and security compliance.

Developing scalable RESTful APIs and optimizing SQL database queries for high-traffic enterprise applications.

Enoylity Media Creation

Sep 2025 – Nov 2025

Machine Learning Intern

Mathura

Engineered end-to-end ML pipelines including recommendation engines and automated classification systems.

Deployed AI-driven backends using Flask, focusing on low-latency response times and robust API integration.

Projects

AI-Integrated Job Portal (Microservices) | .NET Core, Angular, Python, RabbitMQ, SQL

March 2026

Architected a high-scale Job Portal using 8+ microservices, communicating via asynchronous messaging (RabbitMQ).

AI Integration: Developed a Python-based microservice that leverages Gemini AI for real-time ATS scoring and resume parsing, ensuring seamless data flow between .NET services and AI engines.

Designed the frontend using Angular to maintain enterprise-grade modularity and responsiveness.

Quantity Measurement System | .NET Core, N-Tier Architecture, SQL Server

Feb 2026

Engineered a robust Quantity Measurement System using N-Tier architecture to ensure separation of concerns and maintainability.

Implemented complex unit conversion logic and optimized SQL database connectivity to handle large-scale calculations with high accuracy.

Education

GLA University

Mathura, Uttar Pradesh

Bachelor of Technology in Computer Science

2022 – 2026
